## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

**Group I**, drawn to claims 7 – 12 and 15 – 18, which claim a thin film magnetic memory device, comprising: ...; a plurality of dummy magnetic storage portions ... each of the dummy magnetic storage portions includes a third magnetic layer ..., a fourth magnetic layer ..., and a second insulating film ..., and each of the dummy magnetic storage portions ....

**Group II**, drawn to claims 19 – 23, which claim a thin film magnetic memory device, comprising: ...; a plurality of dummy memory cells ... wherein each of the dummy memory cells includes a dummy access gate ..., and a plurality of dummy magnetic storage portions ....

**Group III**, drawn to claims 24 – 27, which claim a thin film magnetic memory device, comprising: ...; a plurality of dummy memory cells ... wherein each of the dummy memory cells includes a dummy access gate ..., and a plurality of dummy magnetic storage portions ... wherein an electric resistance of the plurality of dummy magnetic storage portions ....

**Group IV**, drawn to claims 28 – 31, which claim a thin film magnetic memory device, comprising: ...; ... a dummy resistance gate made of a field effect transistor, ....

**Group V**, drawn to claims 32, which claims a memory device comprising: ...; a third resistor element made of a field effect transistor.

**Group VI**, drawn to claims 33, which claims a memory device, comprising: ...; the plurality of second resistor elements are electrically connected with each other so that at least two of the plurality of second resistor elements are connected in series.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
